

DAKOTA ULTRASONICS

The PX Series

Precision Thickness Gauges

THE PX-7'S echo-to-echo mode offers the user the ability to measure the thickness of materials without removing the paint or the coating.

THE PX SERIES of Precision Thickness Gauges utilize state-of-the-art digital technology to produce fast and accurate readings. The gauges are designed with the user in mind. They are **PACKAGED** in an all aluminum sealed case making it resistant to the working environment. The gauges are simple to operate and are loaded with the **FEATURES** you have requested: Alarm Mode, Differential Mode, Internal Data-Logging and RS-232 data output port to interface with a computer or other data acquisition system.

The gauges have a MEASURING RANGE from 0.0060 to 1.0000 inch, (0.15 to 25.40 mm). Using a single element delay Line transducer, the gauges will measure thin materials in ECHO-TO-ECHO MODE and automatically switch to INTERFACE-ECHO MODE when measuring thicker materials and plastics.

SOUND SOLUTIONS

THE PX SERIES THICKNESS GAUGES

DAKOTA ULTRASONICS PX Series has arrived. The variety of features offered in the PX-7 and PX-7DL allow the user to select a quality tool that will meet or exceed their specific application needs. In the Echo-to-Echo Mode you have the ability to measure the thickness of materials without removing the paint or the coating. Our 5 year limited warranty indicates how we feel about the reliability and durability of the **PX SERIES**.

SPECIFICATIONS

Physical

Weight:

10 ounces (with batteries).

Size:

2.5 W x 4.5 H x 1.24 D inches
(63.5 W x 114.3 H x 31.5 D mm).

Operating Temperature:

-20 to 120F (-30 to 50C).

Case:

Extruded aluminum body
with nickel-plated aluminum
end caps (gasket sealed).

Keypad

Sealed membrane that is
resistant to both water and
petroleum products.

Nine tactile-feedback keys.

Transducer

Single element with delay tip.

10 to 22 MHz frequency range.

Locking quick disconnect
LEMO connectors.

4 foot cable.

Custom transducers available
for special applications.

Warranty

5 year limited.

Power Source

Two 1.5V alkaline or
1.2V NiCad AA cells.

Typically operates for
25 hours on alkaline and
10 hours on NiCad.

Display flashes when battery is
low. Unit turns off automatically
when battery is too low to
operate reliably.

Display

Multi-function 4.5 digit liquid
crystal display with 0.500 inch
numerals, backlit for use in
poor light conditions.

Backlight is selectable on/off/auto
(illuminates only when taking a
measurement).

Bar graph indicates stability
of reading.

Computer Interface

RS232 serial interface. PC software
& USB converter cable included.

Certification

Factory calibration traceable to NIST
& MIL-STD-45662A.

Memory (PX-7 DL)

Automatic Data Logging System
1000 reading capacity, (10 files of
100 readings each).

OBST indicates no reading.

Complete with data acquisition
software and cables.

Measuring

Range:

Measures from 0.006 to 1.000
inches (0.15 to 25.4 millimeters).
Range dependent on material
and transducer type.

Units:

English & Metric

Resolution:

0.0001 inches (0.001 millimeters).

Velocity Range:

0.0492 to .3937 in/μs.
(1250 to 10,000 meters/second).

Four readings per second, single
point measurement.

Single point calibration.

Features

Differential Mode:

Enter acceptable thickness value,
unit will display +/- the difference
from the value entered.

Alarm Mode:

Enter a minimum acceptable thick-
ness value. If measurement falls
outside Hi/Lo limits, red LED will
illuminate and sounds beep- er.
If measurement is between Hi/Lo
limits, green LED will illuminate.

Data Output:

RS-232 output sends data to a serial
printer, a computer or other exter-
nal storage device.
