

DeFelsko Plastic Shims

- Simulate a coating over a particular substrate material or shape. Gage performance can be conveniently verified on a regular basis as required by some international test methods
- For use with all Type 2, electronic coating thickness gages
- Protects the probe from damage or premature wear when placed over hot or abrasive surfaces
- Can be placed on top of soft or tacky coating films to obtain thickness measurements without the gage probe depressing the coating film

Certified Plastic Shims

- Certified shims provide an economical alternative to Coated Metal Plates but have a reduced accuracy
- Each shim is packaged in its own protective plastic pouch
- Certificate of Calibration showing traceability to NIST is included with each shim or set of shims
- Certified and labeled in both Metric and Imperial units

Certified Plastic Shims

Steel and aluminum zero plates are available

Order Code	Approximate Thickness	Color	Accuracy
CS1	25 μm (1 mil)	Orange	+/- 2 μm (+/- 0.08 mils)
CS2	50 μm (2 mils)	Red	
CS3	75 μm (3 mils)	Green	
CS5	125 μm (5 mils)	Blue	
CS10	250 μm (10 mils)	Brown	
CS20	500 μm (20 mils)	Yellow	
CS40	1000 μm (40 mils)	White	
CS60	1500 μm (60 mils)	Black	
CSS	Complete set of 8		

Non-Certified Plastic Shims

- Provide a quick operational check of the instrument by allowing the user to perform practice measurements
- Can be used to protect the probe when measuring on tacky, rough or hot surfaces
- Labeled in both Metric and Imperial units
- Available as a set of 5 (below)

Approximate Thickness	Color	Accuracy
25 μm (1 mil)	Orange	+/- 20%
50 μm (2 mils)	Red	+/- 10%
125 μm (5 mils)	Blue	+/- 5%
250 μm (10 mils)	Brown	+/- 5%
500 μm (20 mils)	Yellow	+/- 5%

Non-Certified Plastic Shims

A package of 5 non-certified shims is included with all DeFelsko electronic coating thickness gages (Type 2).

Note: Shims are generally not acceptable for use with Type 1, magnetic pull-off gages such as the PosiTest FM/GM and PosiPen.
